## Introducing

The NC1000C projector, is the perfect companion for powerful movie experiences. Offering the best-value solution for smaller screens, where you need to see energy savings against xenon, but can't take a step toward laser. With Ultra High Performance Lamps, the NC1000C runs at a lower operating cost whose lamp technology can last nearly five-times that of xenon lamps.

It has exceptional image quality, natural colors, and 3D capabilities.

## Our Exclusive Offer

This is a very special promotional offer and only available exclusively through Omnex.

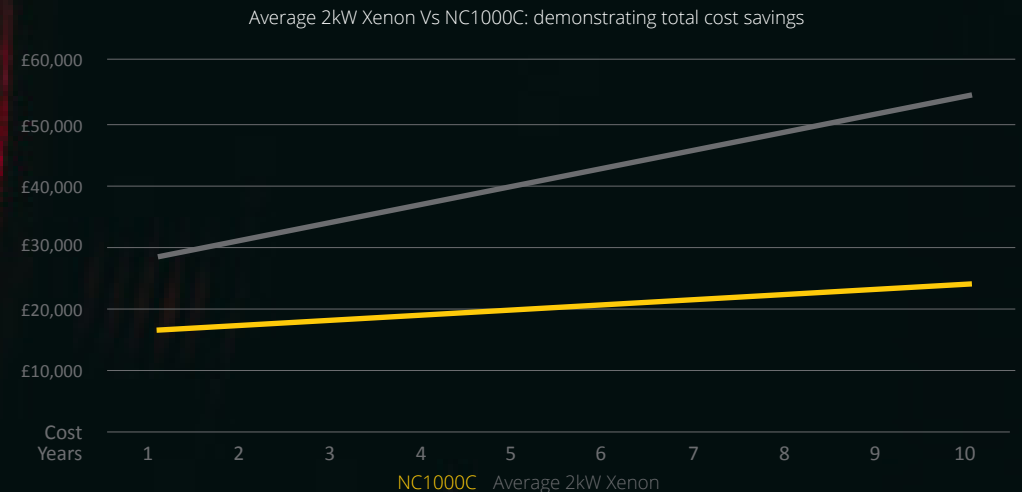

NC1000 (projector only) £16,000

NC1000 with IMS3000 (no lens) £19,950

Lens options (excludes NP9-LS08ZM) £1,500

A projector with lens & IMS3000 for £21,450

Complete with a two-year warranty (with further discounted pricing to extend up to five years).

## Key Benefits

This offer is valid until 30th June 2023, whilst stocks last.

**Highly flexible** – with no exhaust system required, the NC1000C is suitable for floor and ceiling installation and versatile content playback for a range of venues.

**All-in-one** – The Integrated Media Server offers highest flexibility for content management and NAS-connectivity with Real-time Ingest whilst reducing the number of devices required.

**Enjoy a Lower TCO** – easy lamp replacement, lower lamp cost and simple servicing; enjoy better quality imaging whilst experiencing an overall lower cost of ownership.

**Compact, lightweight and quiet** – easy installation in small projection booths, easy transportation for mobile cinemas and perfectly suited for boothless cinemas.
